

## INDIAN LAKES HOMEOWNERS ASSOCIATION, INC. DWELLING UNIT WIRING GUIDELINES

☞ All Dwelling Units are required to have a structured wiring system with the following minimum requirements:

- Structured wiring distribution panel located in a centralized closet area (must be climate controlled).
- Category 5E wiring home run from distribution panel to each computer location (terminated with Category 5E rated plat).
- 1 Category 5E cable and 2 RG-6 quad-shielded cables home run from distribution panel to each primary television area.
- 2 Category 5E cables and 1 RG-6 quad-shielded cable home run from distribution panel to service demarcation location.
- 1 service conduit home run from distribution panel to service demarcation location.
- 4 RG-6 quad-shielded cables run from distribution panel to satellite dish location (if applicable).

☞ All wiring must be run in accordance with standard structured wiring specifications (contact your local professional electronics installation dealer for more detail).

☞ Type of broadband access and television service used will be left up to the discretion of the Owner. Choices of services may be limited by location of Dwelling Unit.
